CNST-710-A.2023SP: Research and Program Evaluation

April 11, 2023

Author Note

In response to a group assignment fostering exploration of mixed methods research, via definition, collection, and analysis of survey data surrounding our research question we delivered a presentation covering this rubric:

- An explanation of how your group used The Research Cycle to inform decision-making for your project
- Problem Identification & Rationale for why your chosen topic is important to study
- Radical Collaboration and Idea Generation
- Literature Review: discuss what past research shows about your topic and how the literature relates to your findings.
- Assessments (Baseline and Posttest)
- Analytic Method (e.g., qualitative and quantitative methods)
- Results and implications
- What you learned as a group and how this will impact your work as a clinician.

Research Methods: We Administered a Survey and Captured Data
